DURSUN İNEL

FRONTEND MANAGER

I AM

I work in the field of software and programming. With the trainings I have received, I take my place in the sector by adding new information to myself every day.

In general, I use HTML, CSS, Javascript and React software tools. I think I am quite good in this field and I add new information to it by following new trends every day.

In the same year, I was promoted and became the head of the Frontend team. Apart from producing work, I am responsible for coordination and training of new team members.

EDUCATION

2018-2021

DATABASE PROGRAMMING
MEHMET RIFAT EVYAP HIGH SCHOOL

2022-2024

COMPUTER PROGRAMMING
ASSOCIATE DEGREE / ISTANBUL TOPKAPI UNIVERSITY

CERTİFİCATES

FREECODECAMP
Responsive Web Design

UDEMY
Detaylı HTML ve CSS Eğitimi

UDEMY
Javascript Programlama Eğitimi

REACT - TURKCELL GELECEĞİ YAZANLAR
React 101 and React 201 Certification

WEB PROGRAMLAMA - TURKCELL GELECEĞİ YAZANLAR
Web 101, Web 201, Web 301 and Web 302 Certificates

SQL - TURKCELL GELECEĞİ YAZANLAR
Database Querying with SQL 101 Certificate

LANGUAGES

İngilizce - A1 / A2

BUSİNESS COMPETENCİES

Since 2019, I have been actively working in the field of web development. During this time, I have developed various projects using HTML, CSS, JavaScript and JQuery. I also have experience integrating and using tools such as Bootstrap, Slick Slider, Swiper.js, Chart.js, Parallax.js and Node.js depending on the requirements of the project.

We communicated with design and backend teammates at all necessary stages of the projects and took action according to the requirements of the situations.

After each project was completed, it was switched to the panel within the company and component adjustments were made so that customers could use it as no-code. After the transactions, I trained each customer on the relevant panel.

At the end of the project, I personally led the Google Analytics and Search Console installations. I have experience using MySQL and MSSQL in database management.

In backend services, I developed my competence by making a web application that follows internal tasks and Authentication operations using Firebase.

Regarding security measures, I applied encryption methods using jwt token and bcrypt.

I gained experience using Node.js and express.js in my React-based application development processes. I also performed Authentication and Authorization processes with Cookie management.

PROJECTS

In general, I have made developments using HTML, CSS, JavaScript. In the last 2 year, I have been working on React-based web projects with React.js-oriented trainings. Some of the projects I have done since 2020 are listed
